Projects

Dev detective </>

- To Enhance my Web Development Skills
- I have Created this Website using Html, Css, Javascript, Tailwind
- This website is used to find a person account on Github by just searching their respective user name

Skills Developed: HTML, CSS, Javascript

Tic Tac Te </>

- Tic-tac-toe can also be played on three Tic-Tac-Toe boards stacked one on top of another, with the goal of being the first to get three in a row on any of the three levels or between levels
- I have created this website using HTML, CSS, java script
- A relatively simple game usually played on a grid of 3-by-3 squares, tic-tac-toe is mainly enjoyed by children

Skills Developed: Javascript, HTML, CSS

Password generator </>

- Use this free strong password generator to create highly secure passwords that are difficult to crack or guess.
- The password generated, based on the user's parameters, is then checked against the zxcvbn library – a standard in evaluating password security – to see how strong the password you generate is. While a strong password can be technically hacked, it would take an imperceivable amount of time to do so.
- Choose the composition of the password and its length, and the system will generate an individual sequence of characters for you.

Skills Developed: HTML, CSS, Tailwind, Javascript

Weather app </>

- weather web site provides official weather warnings, current conditions, forecasts, and weather models, for public
- the forecast information on one page so you wouldn't have to scroll around to different detailed views.
- this website provide accurate weather information, including weather conditions, atmospheric pressure, relative humidity, visibility distance, precipitation in different units, dew point, wind speed and direction, and hourly weather forecasts

Skills Developed: HTML, CSS, Tailwind, Javascript
